Portfolio: rafiqq.github.io/Gabriel_Qureshi_Portfolio

Live client	Co-led the MMU Library prototype. The library later cut its live menu from six items to four and switched to simpler terminology, in line with our advice.
Design systems	Built a Figma design system with variables: primitives, semantic tokens, light and dark modes.
Accessibility	Audited a WordPress site against WCAG and resolved the contrast and alt text errors in code. Designed light and dark modes and checked prototypes against accessibility standards.

PROFILE

Third-year Web and User Experience Design student at Manchester Metropolitan University, looking for a graduate role in UX, product design or design systems. I base my design decisions on user research, work in Figma using design systems, and build accessible interfaces in HTML and CSS.

SKILLS

Research	User interviews, usability testing, personas, sitemaps and wireframes, information architecture
Design	Figma (prototyping, components, variables), UI and responsive design, brand identity, Illustrator, Photoshop
Accessibility	WCAG contrast checks and audits, alt text, light and dark modes, Equality Act (2010)
Build	HTML, CSS, WordPress, VS Code, GitHub

PROJECTS

Collaborative Library Redesign — Case study

- Co-led a team of four on a responsive Figma prototype for the MMU Library website, based on student interviews.
- Ran usability tests as interviewer and transcriber: 3 students did the same 3 tasks on the live site and our prototype.
- Relabelled and shortened the "Referencing and study support" menu to make its terminology simpler and clearer.
- Built the design system as Figma variables with light and dark modes, and co-built coded light and dark versions.

Library Support Ticket Rework — Case study

- Co-designed a support ticket form that is less daunting for students than writing an email.
- Co-created its responsive Figma components and checked it for accessibility.
- Co-wrote and presented the proposal to MMU Library staff. Their feedback confirmed our research was on the right track.

LCA Brand and WordPress Site — Case study

- Designed a logo, moodboard, WCAG-checked palette and poster series in Illustrator for a fictional leopard charity.
- Built its five-page WordPress site, then audited it against WCAG and found failing button contrast and missing alt text.
- Rebuilt it in HTML and CSS with both fixed. Wrote alt text for every image, including the words on each poster.

EDUCATION

BSc (Hons) Web and User Experience Design · Manchester Metropolitan University — 2024 to 2027

A-levels: Graphic Design, Art and Design, English Literature · Loreto College — 2022 to 2024

8 GCSEs including English and Mathematics · Priestnall School — 2022

WORK EXPERIENCE

Customer Advisor · B&Q, part-time — Jan 2025 to Jul 2025

- Resolved customer enquiries and complaints promptly and accurately, passing unresolved cases to colleagues.

Freelance Graphic Designer · Wargeh Cafe commission — Jun 2024

- Designed a cafe menu in Illustrator and Photoshop from the client's brief and acted on feedback to reach approval.

Cafe Assistant · Wargeh Cafe, part-time — Jul 2023 to Jul 2024

- Processed customer orders efficiently as part of a team and communicated clearly with colleagues.

Kitchen Assistant · Valentino's — Feb 2023 to Aug 2023

- Kept a kitchen section clean and organised and monitored stock levels.
